

MK_ICU_MCQ: AI-Powered Intensive Care Education

1. Introduction

MK_ICU_MCQ is a state-of-the-art Telegram bot designed to support the continuous professional development of doctors and nurses working in Intensive Care Units (ICUs). By leveraging local Large Language Models (LLMs), specifically optimized for medical knowledge, the bot provides high-quality, clinical-grade multiple-choice questions (MCQs) tailored for the European Diploma in Intensive Care (EDIC) and other professional certifications.

2. Key Features

- AI-Driven Clinical Scenarios: Every question is a realistic patient case, testing diagnostic reasoning and immediate bedside management.
- Automated Learning Schedule: Receives a fresh question every 6 hours to ensure continuous exposure to medical knowledge without overwhelming the clinician.
- Comprehensive Explanations: Each answer is followed by a detailed clinical analysis and rationale with helpful tips.
- Intelligent Variety: Uses a round-robin system across 21 medical chapters to ensure balanced coverage of all ICU domains.

3. Educational Scope

- * Ch 1: Basic Sciences (Physiology, Pharmacology)
- * Ch 2: Resuscitation & Emergency Management
- * Ch 3: Monitoring & Data Interpretation
- * Ch 4-5: Cardio & Respiratory Disorders
- * Ch 6: Sepsis & Septic Shock
- * Ch 7: Neurological Critical Care
- * Ch 8-10: Renal, Gastro, & Endocrine Disorders
- * Ch 11: Hematology & Oncology
- * Ch 12: Toxicology & Environmental Hazards
- * Ch 13-14: Therapeutic Interventions & Procedures
- * Ch 15: Peri-Operative Care
- * Ch 16-17: Comfort, Recovery, & End-of-Life Care
- * Ch 18-21: Pediatrics, Transport, & Patient Safety

4. Why It Is Important for ICU Clinicians

- High-Stakes Environment: ICU is a fast-paced environment where quick, accurate decisions save lives. Regular practice with clinical scenarios sharpens these skills.
- Exam Preparation: The content is specifically mapped to the CoBaTrICE (Competency-Based Training in Intensive Care Medicine in Europe) domains, the global standard for ICU training.

MK_ICU_MCQ: AI-Powered Intensive Care Education

- Convenience: Clinicians can study during brief downtimes, directly from their smartphones, making professional and personal life balance easier.
- Reliability: Runs on local infrastructure to ensure privacy and availability.

5. How to Start

Find the bot on Telegram and use these commands:

/start - Register and receive your first question.

/next - Get a new question immediately.

/stop - Pause the scheduled questions.

/resume - Continue receiving periodic questions.

/help - View this guide at any time.
